

## New Format For The Monthly Email Notification

*It will now be in a newsletter format*

**Larry Bettes**

*City of Redding / Shasta College*

The notification of the monthly meeting will now be coming to you in a different format: as a newsletter! I hope to provide some information to hopefully draw more attention and greater attendance!

**This is your group!** Come! Ask questions and get answers! This is the place to learn about the newer features of the current Autodesk software, whether you are using it or not! You need current information to make informed business decisions. ❖

---

*Beverages and cookies are provided by Tim Corey, as usual; however, the group provides PIZZA each month! So food is no excuse for not attending!*

---

## New Toshiba Projector

After two months of sorting through all the various options, we have finally purchased a projector for the group. If you have not been in attendance recently or have forgotten, the group voted in January to purchase a projector, so that we would always have one available for our meeting, even when Tim was out of town and using his for trainings. ❖

**Next month's meeting:  
Monday, May 12, 2008**

## Monday, April 14, 2008

*5:30 PM at Delta Engineering Systems,  
1438 Hartnell Avenue, Redding*

### Agenda

#### OLD BUSINESS:

- Projector Purchase
- Raffle Software – **We finally have software available and this is an even month, SO there will be a raffle!**
- NCAUG domain w/ Email

#### NEW BUSINESS:

- Training Topic: Sheet Sets & Page Setup Overrides
- 2009 Autodesk software versions now shipping! Unfortunately, Tim Corey is not available to give a presentation as we had hoped (maybe next month). However, I have received my new AutoCAD Architecture 2009, so we can still take a look at the new stuff.
- Meeting Day and Time

#### HAVE YOU SEEN THE NEW ADVERTISEMENTS?

Last month, Greg was able to make arrangements with our local newspaper to have an announcement published each month about our non-profit group meeting. Also, Tim Corey has graciously provided us space in the new monthly news letter for Delta Engineering Systems. ❖
