

Civil 3D: Inside & Out

Shasta College classes begin August 17th

Using Civil 3D and knowing how to be productive with Civil 3D are two very different things! Many people have made the transition to using C3D out of necessity; their LDT software is simply no longer supported. However, actually understand the potential of this new design software.

Shasta College can help! The college offers a two-semester sequence of in-depth study using the Civil 3D software. It covers all aspects of the software including plan production tools, the new intersection wizard, and the quantity take-off manager. Much of the first semester is dedicated to a book-based study of the software, while the second semester is dedicated to a real-world subdivision design project scenario.

The course is Tuesday evenings. For more info contact Larry Bettes, 245-7127, lbettes@shastacollege.edu ❖

the group provides PIZZA each month!*

HOT AutoCAD Tip

From Perry Medina, CADalyst, Tips & Tricks Weekly

Text you cut and paste into AutoCAD does not always assume the font you expect. "To help eliminate any surprises, first paste the copied text into Notepad, then copy the text from the Notepad file into AutoCAD. This will usually strip the text of any formatting from the original source."

Wednesday, Aug. 12, 2009

5:30 PM at Delta Engineering Systems,
1438 Hartnell Avenue, Redding

Proposed Agenda
