

Delta Engineering Systems

Damage from water leak still being repaired

You may remember that we had to relocate the meeting last month because of water damaged from a leak in the wall at Delta Engineering Systems. There was apparently an issue with getting the repairs completed in a nice timely manner (that always seems to be the case with insurance companies involved) but Tim says the meeting will be able to happen as usual in the DES classroom. We just have to excuse the dust of the repairs still in progress.

Tim, we feel your pain! See you all there next week. ❖LB

*Beverages and cookies provided by Tim Corey,
the group provides PIZZA each month!*

AU at Mandalay Bay

Registration has begun

With the weak economy, the attendance this year will most likely be lower than last, but the training should be as good as ever. I won a free admission during a trivia competition last year, so I will be going again! I have been negligent in the area of photographically sharing the event with the group the last two years and plan to remedy that this go around. ❖LB

HOT AutoCAD Tip

Have you ever tried to list an object only to realize it is part of a block or xref? Use XLIST. This express tool lists the type, block name, layer name, color, and linetype properties of a nested object in a block or an xref.

Wednesday, Sept. 9, 2009

5:30 PM at Delta Engineering Systems,
1438 Hartnell Avenue, Redding

Proposed Agenda
